

# 2019 Fall Living Covers Planted in All Crops

**Statewide, a total of 950,000 cropland acres had living cover crops and cereal grains planted in them after harvest.**

## Living Covers Planted (acres)

Due to the COVID19 pandemic, some transect surveys were not completed in the interest of protecting the health and safety of our conservation partners. These incomplete surveys were supplemented using 5-year averages.

Cropland acreages calculated from 2019 NASS Cropland Data Layer.

\*Windshield surveys were conducted between November 2019 and April 2020, and therefore do not reflect residues that are disturbed outside of said timeframe. See SPRING tillage transect results at <https://www.in.gov/isda/2383.htm>
